

# PROJECT 9.

## Sketches

Chosen design.

## 16 Post cards.

### -Self critique.

The adjective I chose for my design is Elegant. I chose yellow, violet, and violet mixed white to create tint; I have chosen those colors because I feel they create a great contrast, and it looks more professional. I chose circle and rectangle as my shapes to create a design that you can enjoy. I wanted to create something easy for the eye and I think that the shapes chosen, and the texture create an easy-going view. I used the curve lines to create a vibrant texture in the design. Contrast it is also part of my design; the colors yellow and purple create a big contrast making the circle looks under the rectangles. The design creates a perspective that makes us see a movement thanks to the curve lines. It looks like if were a universe. I would say that the most successful thin I had done it is that even though the shapes pop out more that anything, the design crate a visual flow. I also think that I chose the right colors for my design. The unsuccessful part it is that some of my cards are dirty from the back and that really bothers me. I also think that I could have done more if I had more time. I am happy with my result, but I think it looks simply.
